

Job Description

Position: Machine Operator and/or Manufacturing Team Member
Salary: Dependent on experience, plus benefits (\$16-\$18 per hour)
Location: Rock Hill, South Carolina
Classification: Non-Exempt

Winbro Group is a world market leader in the development and manufacture of special purpose machining systems and machining technologies of precision components. In addition to providing machine tool turnkey solutions for the Aerospace, Electronics, and Industrial Gas Turbine Industries, they offer supported onsite facilities management to give clients full support and technical backup. Winbro is at the forefront of their industry leading in new technologies in design, development and manufacture.

Role and Responsibilities:

- Operation of CNC machine tools to produce cooling holes and other features in various types of Gas Turbine and Electronics components.
- Responsible for inspection of completed operations using equipment such as automated CMMs & optical vision systems and manual gauges and tooling.
- Meet or exceed production targets and complete visual trackers to display progress.
- Complete manual and PC based production records and identify any non-conformance and record via the company software.
- Maintains the work area and equipment in a clean orderly condition and follows prescribed safety regulations.
- Complete daily preventative maintenance checks and raise any issues or areas of concern.
- Ensure machines are maintained in an optimum condition by changing consumables as required, i.e. electrodes & tooling.
- To undertake any other reasonable duties as requested by your line manager on a permanent/temporary basis.

Skills & Experience

- CNC Machine Tool experience is highly preferable, especially electro-discharge machining (EDM).
- Practical experience and understanding of Aero and / or Industrial Gas Turbine Component manufacture is also preferable.
- Ability to use basic measuring equipment such as micrometers and callipers.
- Ability to communicate effectively with others.
- Attention to detail and ability to operate competently in an aerospace manufacturing environment (Winbro is AS9100D accredited and upholds high quality standards).

Requirements:

- US Citizen or existing Green Card Holder.
- Ability and desire to work in a team environment.
- Strong PC skills / literacy
- Good level of manual dexterity.

Qualifications:

- High school or GED required, Vocational or Technical training recommended, Bachelor's or Associate's Degree preferred.
